

Student access to live-streamed classes

When your classes are live-streamed, you can access the stream and any associated resources in a similar way to accessing your lecture recordings.

Part One: Navigating to the Class

Your module lead will inform you when a class will be live-streamed. Here are the steps to take to find the relevant stream.

1. Login to your VLE/LMS and navigate to your course page;
2. Click on the Echo360 link to view all your course recordings;
3. Look for the relevant session
4. If you arrive before the session is scheduled to begin you will see a greyed out 'Live' icon;

5. Clicking into the session you will be notified when the session (and live-stream will begin.

Live Stream Starts in 05:43

6. If you arrive after the session has started, you will see that the 'Live' icon has changed colour to green.

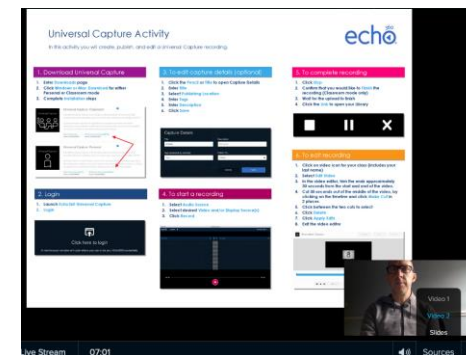

Part Two: Viewing the live stream

You can control how you view the live stream. If you are present in a classroom then it is unnecessary. However, for remote learners, the stream can be enabled, with interaction between the teacher and your peers possible using the engagement tools (Polls, Q&A, Confusion Alert)

1. For remote learners wishing to access the live-stream, click on the relevant session;
2. You will first see a Powerpoint slide, if a presentation has been added.
3. In the lower left of the window, you can enable a live-stream by clicking on the button 'Show Live Stream';

Show Live Stream

4. You will now see the teacher's display and/or video, and be able to hear the audio commentary;

5. You can view a list of all other class participants, make notes, view and post to a discussion thread, add bookmarks and declare if you are confused using the engagement tools.
