Select a Cross-Listed course

For cross-listed courses, iClicker will list the entire cross-listed course as well as each section individually. Make sure to select the correct line to ensure the correct roster appears in the iClicker software.

In the example above,
- Line 1 will display the entire cross-listed roster (Sections 001 & 005)
- Line 2 will only display the roster for Section 001
- Line 3 will only display the roster for Section 005

Examples
- If all sections are meeting at the same time, it is best to select the entire roster (Line 1)
- If sections are meeting at different times, it is best to create an iClicker course for each section and then select the appropriate section for each iClicker course (Line 2 or 3).
- If each section is being taught by a different Instructor, create an iClicker course for each section and then select the appropriate section for each Instructor (Line 2 or 3).

Help
