

Using iClicker 7.9 and above on macOS 10.12 Sierra

iClicker versions 7.9 and above work with macOS 10.12 Sierra, if iClicker was on the computer before it was upgraded to Sierra.

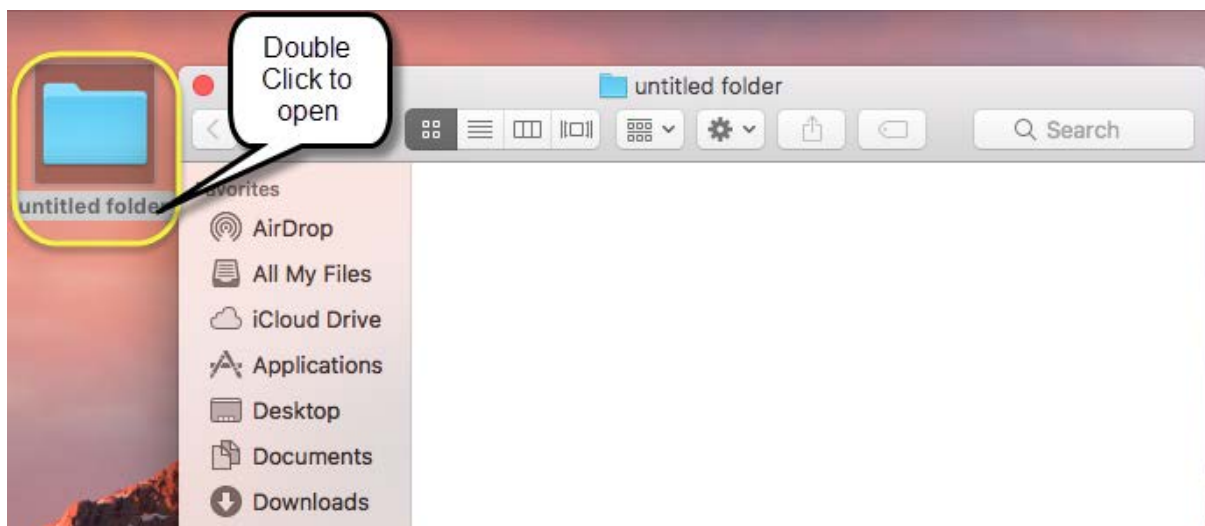

If a computer has macOS 10.12 Sierra and does not have iClicker currently installed on it, the following instructions must be followed for iClicker to interact with CSU's instance of Canvas.

Create iClicker folder on the desktop

A new folder has to be created to hold the new iClicker software. Navigate to the desktop, or any other location on the hard drive, click on the File menu and select New Folder.

Double click on the new folder to open it.

Download the iClicker .dmg file

The iClicker .dmg file must be downloaded from the iClicker downloads website, <https://www.iclicker.com/downloads>

Users must download the iClicker Classic software by clicking on the Download Options button, which is located to the right of the iClicker Classic description.

Downloads

Instructor Software

~~iClicker Cloud~~

Formerly Reef Instructor. Cloud-based, mobile-optimized instructor software. Works with iClicker Reef, iClicker 2, and iClicker+ student solutions.

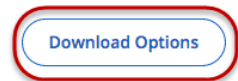

Requires Windows 7 or Mac OSX Mavericks (10.9.5) or newer.

iClicker Classic

Formerly iClicker 7. Simple, fast, local data storage. Works with iClicker Reef, iClicker 2, and iClicker+ student solutions.

Requires Windows 7 with .NET 4.0.3 or newer, Mac OSX Mavericks (10.9.5) or newer, or Linux (Ubuntu 12.04,

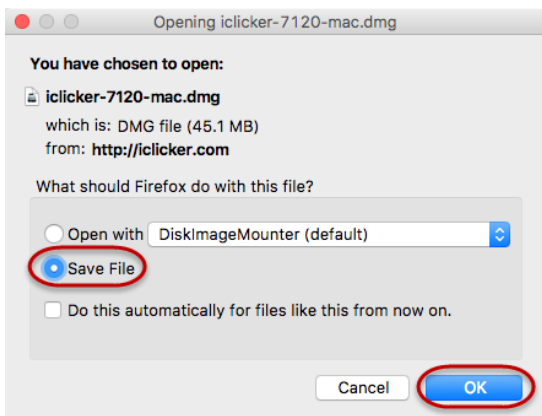

Note: CSU is currently testing the iClicker Cloud software, but at this time we are not supporting iClicker Cloud. The iClicker Cloud software will not work with CSU's instance of Canvas.

On the Download iClicker Classic page, click on the Mac icon.

Download iClicker Classic

When asked what to do with the .dmg file, click on the Save File option and then click OK. This will save the .dmg in the Downloads folder.

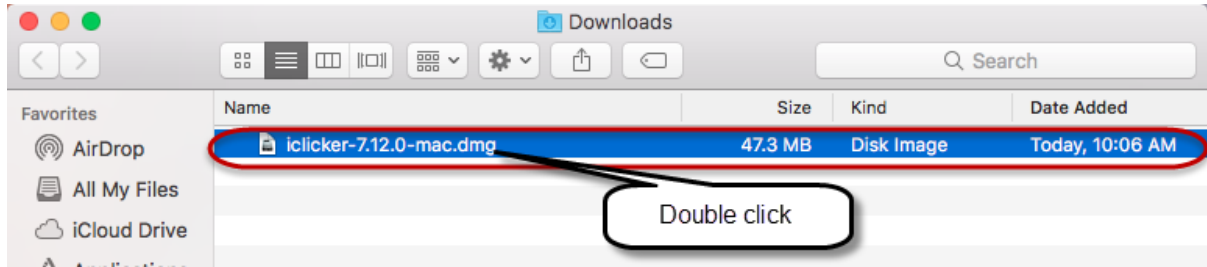

Mount the .dmg file

Navigate to the downloaded iClicker file, which should be located in the Downloads folder, by clicking on the Downloads icon on the Dock.

Double click on the iclicker-7.12.0-mac.dmg file to mount the file

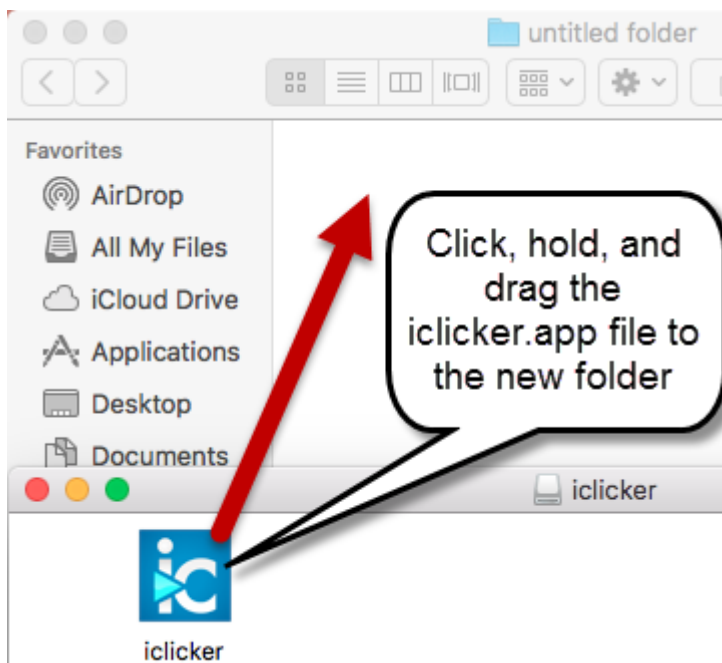

A new folder will open containing the mounted .dmg file.

Copy mounted file to the created iClicker folder

The iClicker file must be copied into the [iClicker folder that was created](#) at the beginning of this document.

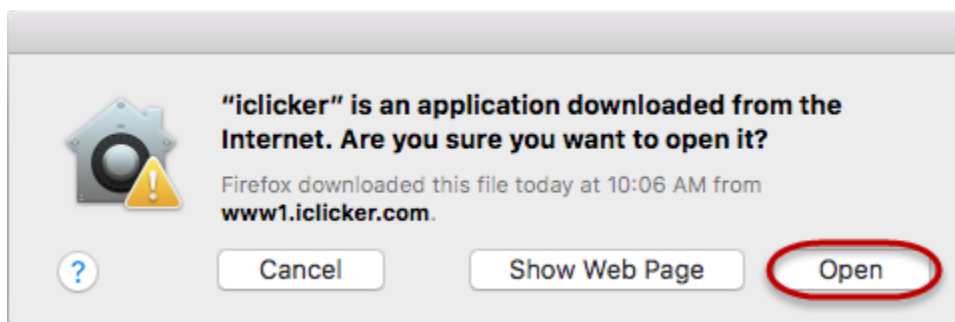

Open the new iClicker folder, as well as the folder containing the mounted iclicker file, and then click, hold, and drag the iclicker file into the newly created iClicker folder.

When the iclicker.app file is in the new folder, double click on the icon.

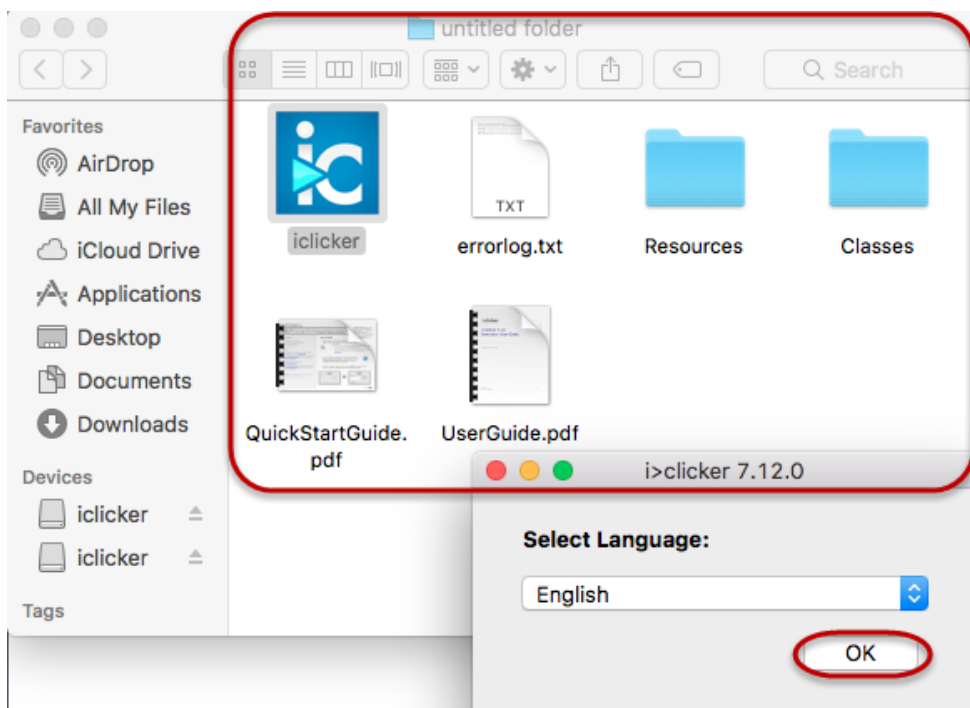

If the systems asks to open the file, make sure to click on the Open button.

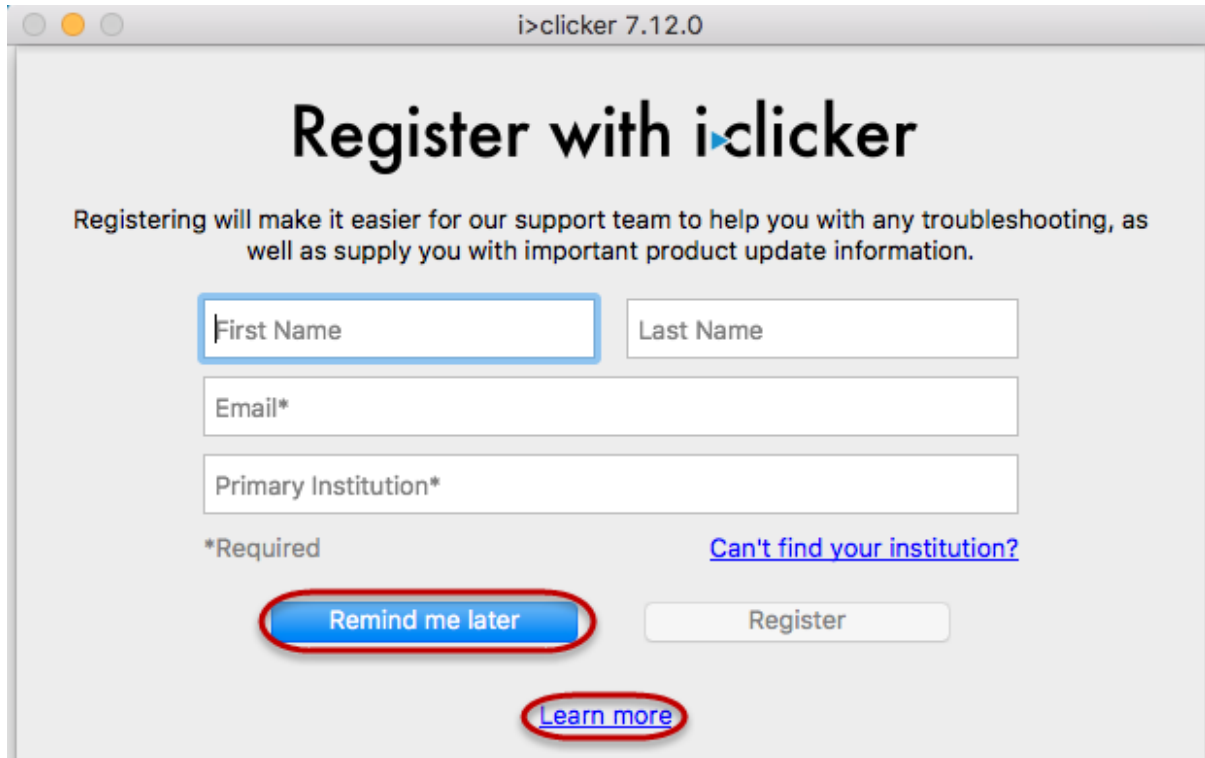

iClicker will create multiple files in the new folder and then launch then iClicker software.

Select the appropriate language for the software, and then click on the OK button to launch iClicker.

Note: iClicker version 7.12 will ask all Instructors to register their software with iClicker. Information about the iClicker registration process can be found [here](#), or by clicking on the Learn More link on the registration window.

To skip the registration process, click on the Remind Me Later button.

The iClicker program must be closed and a file copied into the folder before it will work with CSU's instance of Canvas.

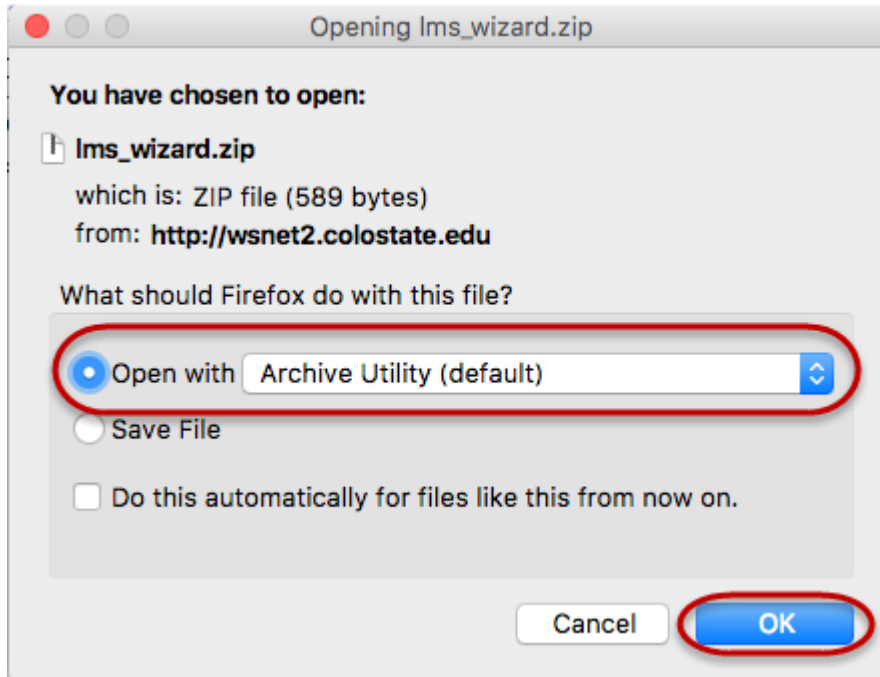

Close iClicker by navigating to the i>clicker menu and selecting Quit iclicker.

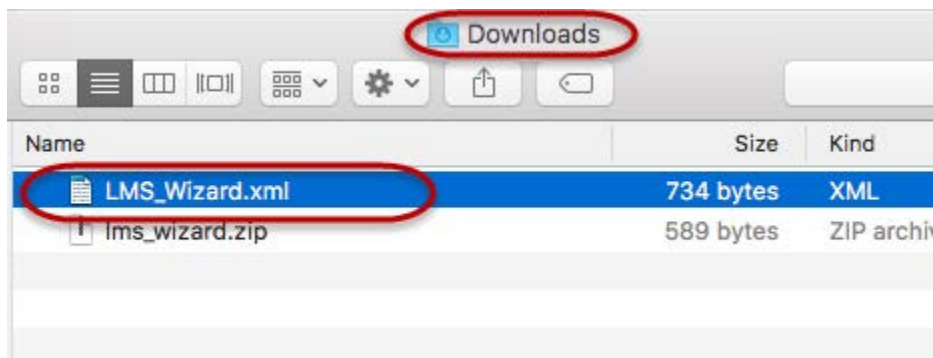

Downloading the LMS_Wizard.xml file

The LMS_Wizard.xml file must be downloaded from [here](#).

When asked what to do with the LMS_Wizard.zip file, select the Open with Archive Utility option and click OK.

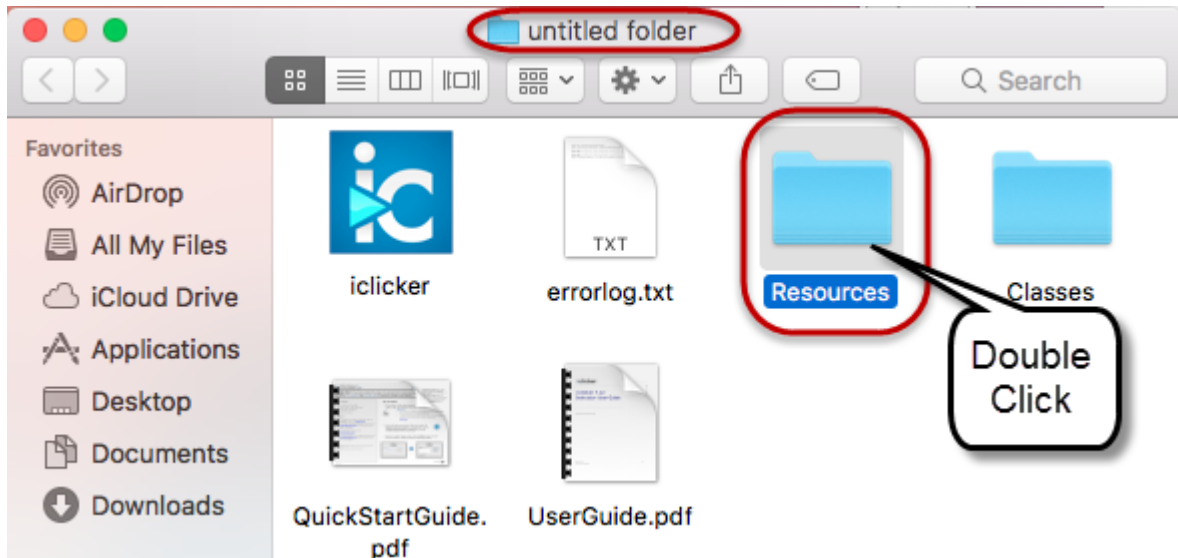

The file will be unzipped and opened in the Downloads folder.

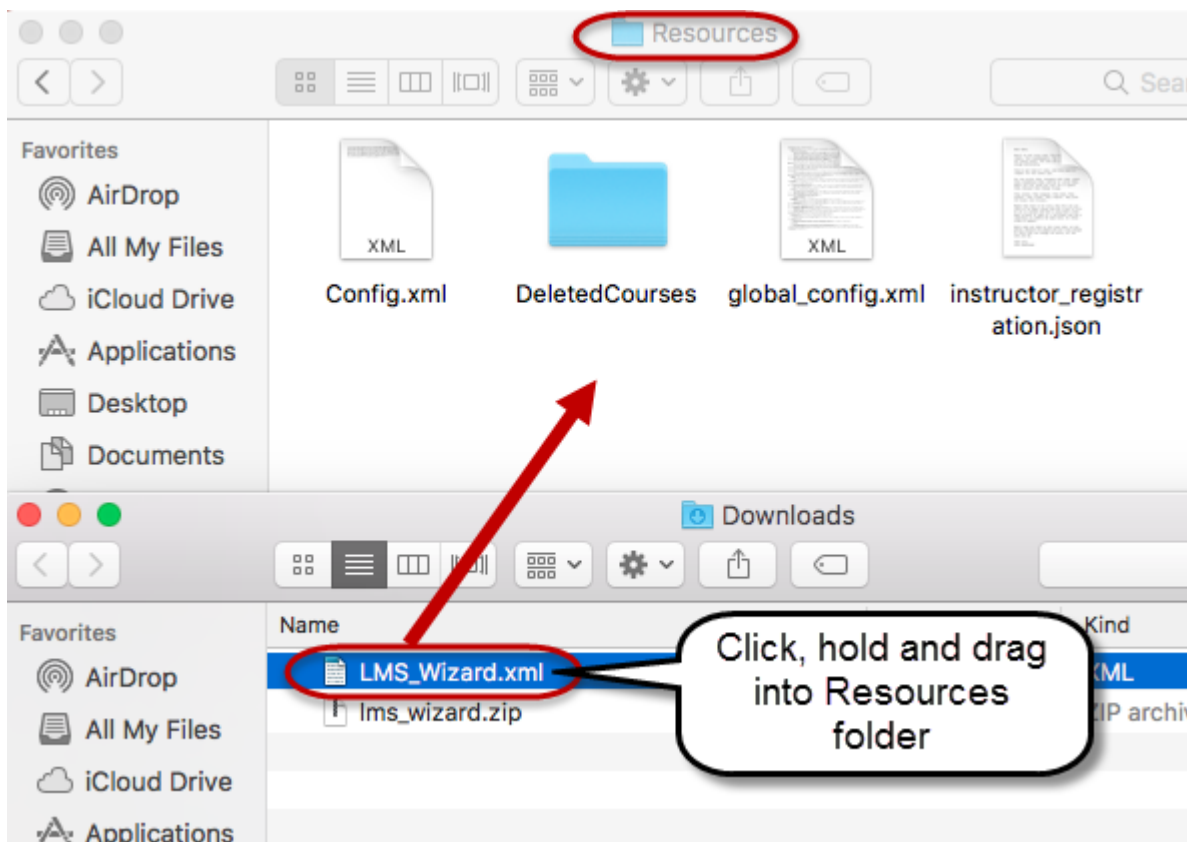

Copying the LMS_Wizard.xml file

The LMS_Wizard.xml file must be copied from the Downloads folder into the iClicker Resources folder.

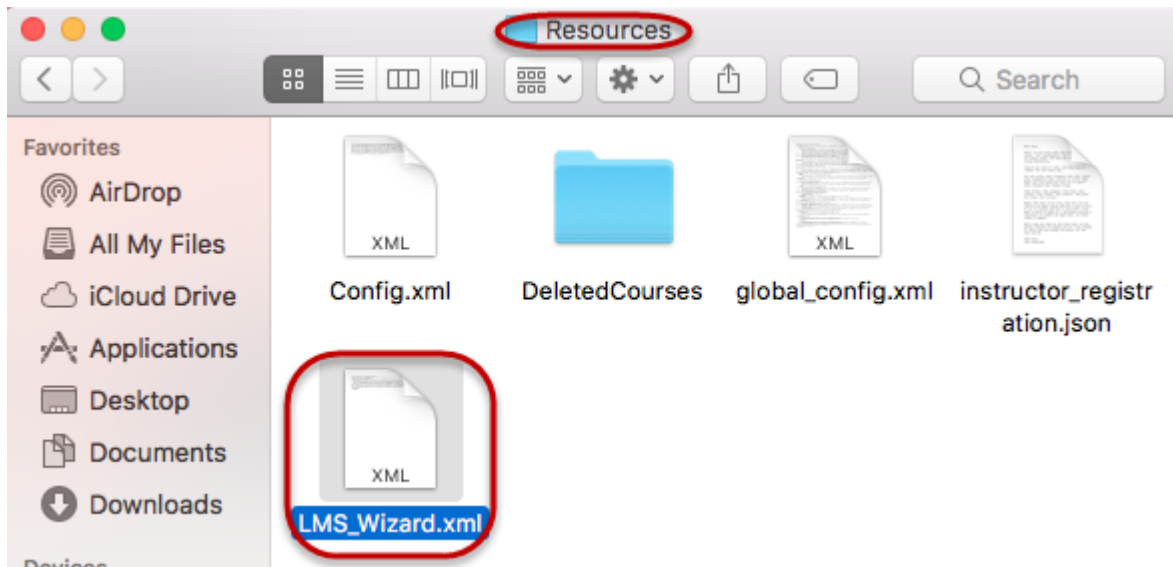

In the iClicker folder that was created, double click on the Resources folder to open it.

Navigate to the Downloads folder on the dock and then click, hold, and drag the LMS_Wizard.xml file into the Resources folder.

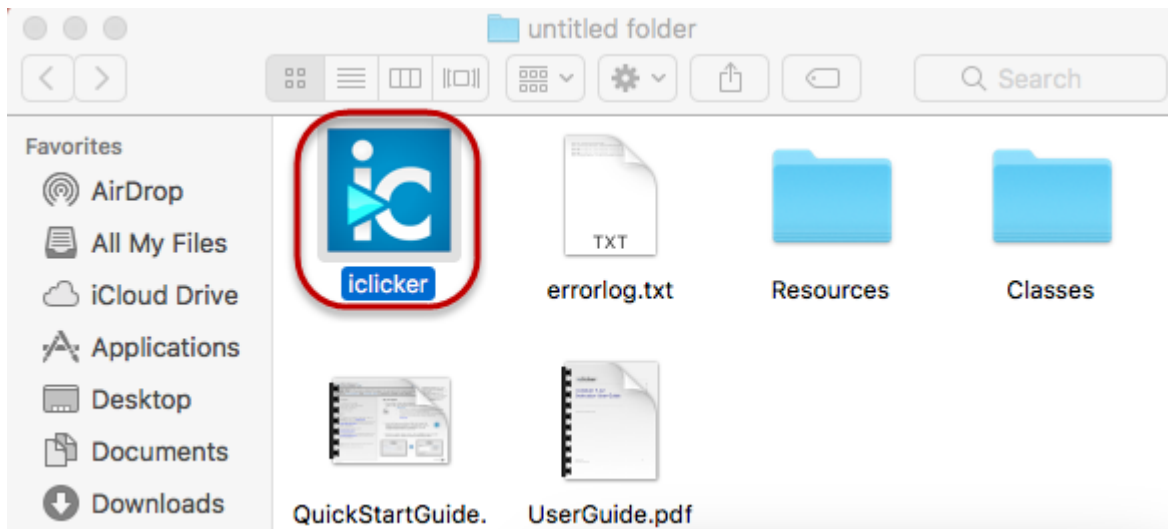

With the LMS_Wizard.xml file in the Resources folder, iClicker is configured to work with CSU's instance of Canvas.

Opening iClicker

To open iClicker, navigate to the root iClicker folder and double click on the iclicker.app file

This iClicker folder may be moved to any location on the computer, or on a flash drive.

Note: The entire folder with all associated files must be moved. If the iclicker.app file is moved out of this folder, the iClicker software will not function.
