

# DOWNLOADING I>CLICKER TO MAC OS X

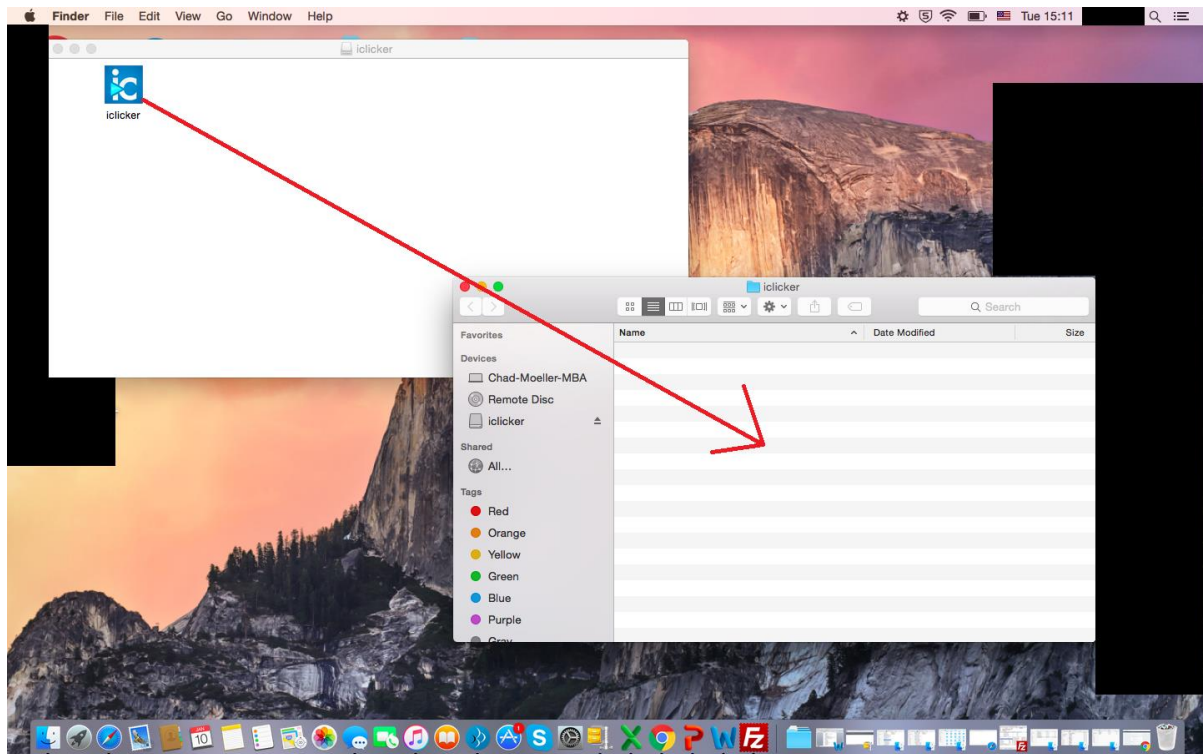

Step 1: Downloading the .dmg file

1. Go to iclicker.com.
2. Click Menu.
3. Select Downloads and Release Notes.
4. Select the Mac OS X Version of the i>clicker software.
5. Complete the form and download the .dmg file.

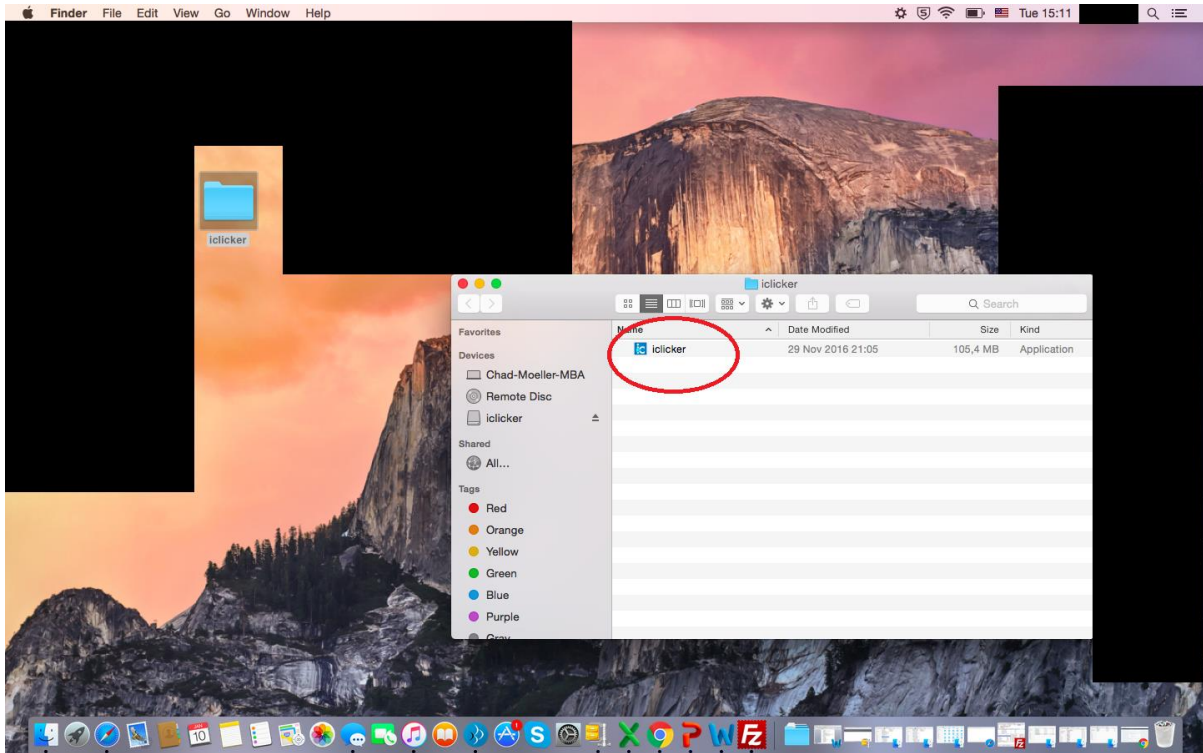

## Step 2: Creating a new folder

1. Click File and select New Folder to create a new folder on your desktop.  
Alternatively, you can create a folder somewhere else on your hard drive.
2. Open your new folder.

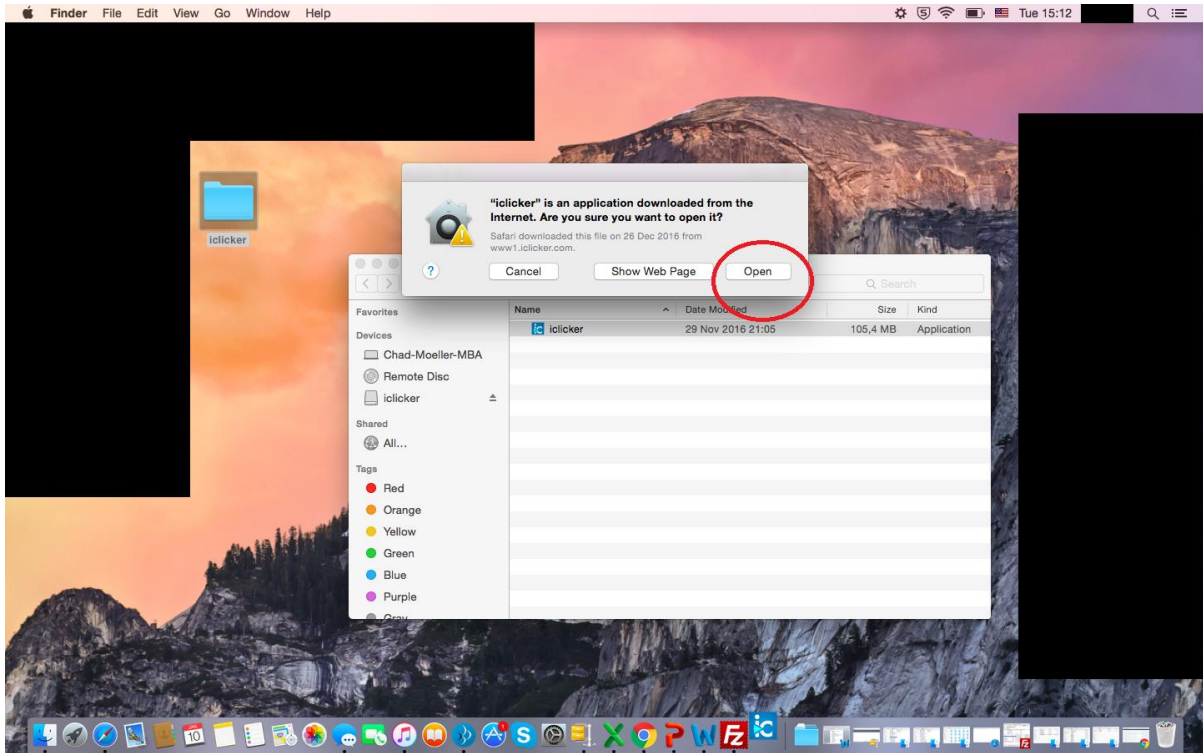

### Step 3: Mounting the .dmg file and transferring the iclicker.app file

1. Double-click on the downloaded .dmg file to mount it.  
Please make sure that you do not open the iclicker.app file for now.
2. Transfer (drag) the iclicker.app file to your new folder.

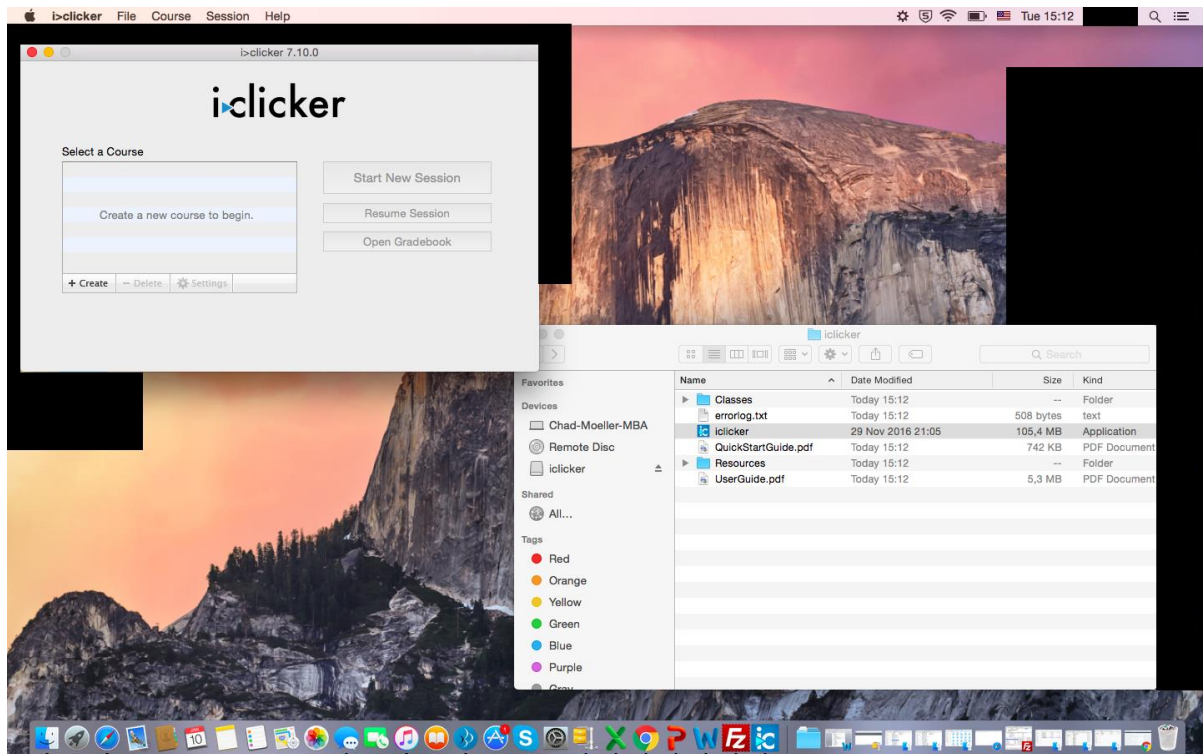

Step 4: Please double-click on the iclicker.app file within your newly created folder.

Step 5: If the system asks you if you want to open this file, please click Open.

### Step 6: Launching i>clicker

1. Double-click on the i>clicker application to launch it.  
As you can see, i>clicker has created all the i>clicker-related files that you need.
2. (Optional) Close the application and move your i>clicker folder to a desired place on your computer or your thumb drive.

Step 7: Copy and paste the integration file (LMS\_Wizard.xml) provided by your administrator into the Resources folder.
